

The HDR team supports the
U.S. DEPARTMENT OF ENERGY
for NEPA Services

HDR, Engineering Inc. a full-service environmental and engineering firm, offers the full spectrum of expertise needed to address the unique needs of each NEPA project using the services of integrated and highly specialized teams working together to meet project goals.

As a leading provider of science-based planning and communication support to federal agencies and industrial clients, Battelle has successfully completed hundreds of EISs, EAs, and other NEPA analyses for numerous federal agencies, including DOE.

LATA, a service-disabled veteran-owned small business, has performed a variety of NEPA support projects and developed a strong sense of DOE/NNSA goals and expectations for its NEPA program over the past nine years.

LEI, also a service-disabled veteran-owned small business, provides scientific, operational, and research support including NEPA implementation, health and ecological risk assessments, and environmental compliance.

REPRESENTATIVE PROJECTS

In order to provide DOE with the broadest and deepest possible resource base from which to draw upon for its NEPA work, the HDR team combines the discipline depth, geographic reach, and broad NEPA perspective gained through service to a wide range of government and industry clients. A sampling of those projects include:

Iberdrola and the Bureau of Land Management

Dry Lake Wind Project
Specific Environmental Assessment

Department of Energy

Rocky Flats Environmental Technology Site,
Site-Wide NEPA Support

Department of Energy

Remediation of the Moab Uranium Mill
Tailings, Final EIS

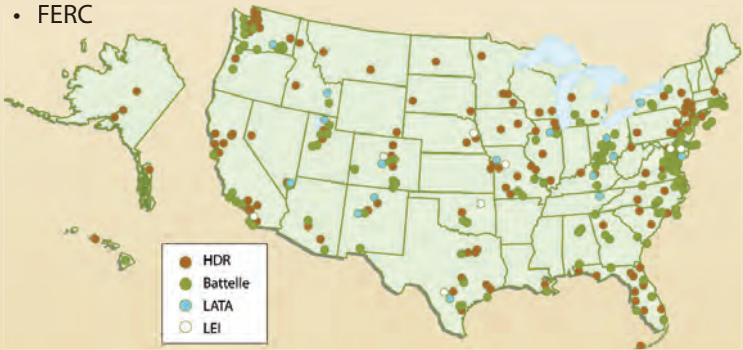

Department of Energy,

Lawrence Livermore National Laboratory

EA for the Proposed Construction and
Operation of a Biosafety Level 3 Facility

DOE MISSION-RELATED EXPERIENCE

- Power Grid
- Renewable Energy
- NNSA Support
- Environmental Management
- Legacy Management
- Nuclear Energy and NRC Interface
- Fossil Energy
- Radioactive Waste Management
- FERC
